for Registrar General, India.

NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

REMARKS

The figures of births and deaths shown in this statement for the week ending the 23rd September, 1950 relate to 182 towns with an estimated population of 23,980 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 78% of the total number of towns representing 84% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 17,191 and 8,940 representing birth and death rates of 37·3 and 19·4 per thousand of population respectively.

(A) States (Parts A & C).—The data here relate to 159 towns with an estimated population of 21,468 thousands. Information about Assam, Bihar and Madhya Pradesh could not be included. The total number of towns is 201 and their population is 24,668 thousands. Thus 79% of the total number of towns representing 87% of the total population is covered. The numbers of births and deaths recorded in these towns were 15,350 and 8,132 representing birth and death

rates of 37·2 and 19·7 per thousand of population respectively. The table at the end gives the position by states.

The towns of Tanjore and Virudhunagar in Madras recorded high death rates of 55·0 and 50·6 per thousand of population and these high rates were not due to any one of the specified cause.

(B) States (Part B).—The data here relate to 23 towns with an estimated population of 2,512 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 72% of the total number of towns representing 67% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,841 and 808 representing birth and death rates of 38·1 and 16·7 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.

REMARKS

The figures of births and deaths shown in this statement for the week ending the 30th September, 1950 relate to 185 towns with an estimated population of 24,568 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 79% of the total number of towns representing 86% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 20,564 and 9,851 representing birth and death rates of 43.5 and 20.9 per thousand of population respectively.

rates of 44.5 and 21.1 per thousand of population respectively. The table at the end gives the position by states.

Aruppukotai in Madras was the only town which had a high death rate of 52.0 per thousand of population and this high death rate was largely due to deaths from dysentery and diarrhoea.

(B) States (Part B).—The data here relate to 28 towns with an estimated population of 3,053 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 81% of the total number of towns representing 81% of the total population is covered. The numbers of births and deaths recorded in these towns were 2,171 and 1,132 representing birth and death rates of 37.0 and 19.3 per thousand of population respectively.

Rajkot in Saurashtra was the only town which had a high death rate of 76.2 per thousand of population and this high death rate was largely due to death from fevers.
